Technical card of heat pump

TERMET HEAT GOLD

Reversible air heat pump for heating and cooling

Termet Heat Gold

- monoblock construction - possibility of installation without f-gas certification by the installer
- reversible heat pump designed for both heating and cooling of rooms
- outdoor installation
- highly efficient inverter compressor
- durable Mitsubishi compressor
- electronic expansion valve
- ecological refrigerant R32 with low greenhouse effect potential GWP=675)
- extremely economical heat pump in A+++ class (A7/W35)
- housing made of sheet metal resistant to weather conditions
- quiet operation of the device
- possibility of cooperation of the pump with photovoltaic panels thanks to SmartGrid function
- outdoor temperature sensor built in the heat pump
- easy control of the heat pump operation by means of
- HPmulti controller - the controller is equipped with a touchscreen color display
- possibility to control and monitor heat pump operation parameters via the Internet using the ecoNET300 module
- HPmulti regulator and ecoNET300 module included , heat pump

HPmulti

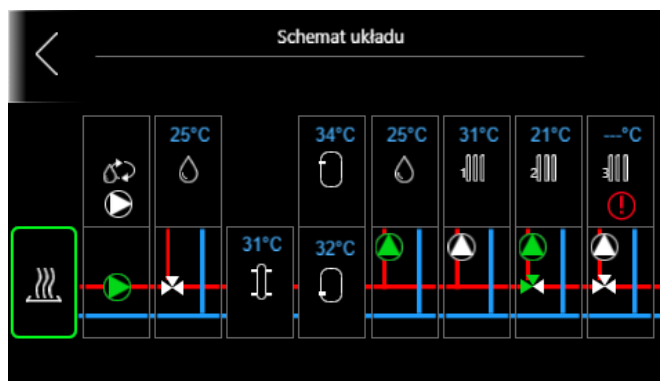

Easy control of heat pump operation with HPmulti controller:

- touchscreen color display
- control of operation of 3 heating circuits (1 direct circuit, 2 circuits with mixer)
- control of operation of the domestic hot water circuit and circulation pump
- creation of time schedules separately for heat pump as heat source, heating circuits and domestic hot water
- clear and easy-to-use menu
- cooperation with additional devices e.g. room thermostat,
- intuitive and easy to use graphical menu for the user and clear transmission of information about the status of the heating system,
- heat pump controller with SmartGrid function allows intelligent management of heat pump cooperation with photovoltaic panels,
- the possibility of cooperation with an additional heat source,
- possibility to regulate the operation of the system depending on the outside temperature (weather function)
- easy software update with the help of a memory card
- parental control (allows you to lock the touch screen from children)

Internet module ecoNET300

- Ability to control and monitor the heat pump's operating parameters over the Internet via www.econet24.com or through an app (Adroid and iOS):ecoNET.apk,
- ecoNET.apk,
- ecoNET.app

– technical data of recommended equipment

- set of sensors on the heat pump equipment:

- 1) outdoor temperature sensor - 1 piece
- 2) DHW tank temperature sensor. - 1 piece
- 3) buffer temperature sensor - 1 piece

- accessories included in the HPmulti package:

- 1) HPmulti controller - 1 piece
- 2) LCD control panel - 1 piece
- 3) internet module ecoNET300 - 1 piece
- 4) NTC temperature sensors- 2 pieces
